

Science IN THE Cinema

Extraordinary Measures

This inspirational drama, based on real events, tells the story of John and Aileen Crowley who defied scientific and social convention by finding a researcher working on a cure for their children's rare and deadly genetic disease. Together with researcher Dr. Robert Stonehill, the Crowleys create a biotechnology company with the aim of producing a drug that can cure their children before time runs out.

The film will be introduced by Dr. Rachel Syme, Adjunct Assistant Professor in the Department of Oncology at the University of Calgary and Operations Leader for the Alberta Clinical Cancer Research Unit. Following the movie presentation, Dr. Syme will lead a discussion on the latest in clinical trials and drug development.

6:30 PM – 9:30 PM • Thursday, December 2nd, 2010

The Plaza Theatre • 1133 Kensington Road N.W. • FREE Admission & popcorn
